

DA SERIES

Intelligent by design

When you deploy softphones in your customer service center, Plantronics DA Series USB audio processors deliver a more complete audio experience by providing context for every call. The DA Series offers exceptional quality and control, and they also help you meet OSHA and Noise at Work specifications. With Plantronics and third-party software applications you will be able to communicate with intelligence and activate new experiences for your team and your customers.

DA80

High-performance USB audio processor for analog headsets.

DA70

Entry USB audio processor that connects to analog headsets.

Enhanced noise-canceling

DA SERIES

Lightweight and simple to use, with USB easy-to-operate connections and Quick Disconnect features so your team can easily switch between workstations. With built-in Digital Signal Processing for leading audio clarity, Noise at Work protection for associates, and enhanced controls to improve customer conversations. The full CI functionality on advanced models goes one step further—providing operational insights to improve personnel performance, processes and inventory management.

DA70/DA80

KEY FEATURES

- Modern and sophisticated styling conveys quality and confidence
- Easy, at-your-fingertips interface enables representatives to bypass on-screen call control menus for better focus on callers (DA80 only)
- Quick Disconnect (QD) feature provides walkaway convenience and compatibility with all Plantronics QD-equipped headsets
- Superior noise and echo cancelation means richer, clearer conversations
- Acoustic exposure algorithms helps you meet OSHA and Noise at Work regulations
- Free, open APIs to add intelligence or inform work flows and business processes by building a contextual bridge across customer care ecosystem
- Downloadable firmware updates and unique serial numbers creating consistent management of devices across your center

Intuitive call controls

Connects to	PC via USB and Plantronics QD-equipped analog headsets
